

FAST IR 305

Properties

These compact robust systems form an ideal installation for quartz tungsten/halogen glass tube emitters (sold separately). Optimum efficiency is achieved by highly polished aluminum steel reflection and near mounted axial flow fans, which eliminate rear convection losses and keep the reflectors cool for better directional quality on the infrared output. The external body which manufactured from aluminum can be maintained at “touch safe” temperature.

Technical specification

Material	Aluminium external body with polished aluminium steel reflectors
Dimensions	305 x 305 mm
Average weight	5.6 kg
Standards	CE
Configuration	4 tube: 4kW 5 tube: 5kW
Voltage	240 V
Recommended Emitters	1000 W QTM 1000 W QHM
Fixing	4 x Aluminium stand off with M6 threaded screw with fixing nut
Electrical Termination	1.5m of 20mm diameter flexible metal conduit with additional 0.5m of glass fibre insulated NPC conductors
