

Ceramic Bead

Technical specification

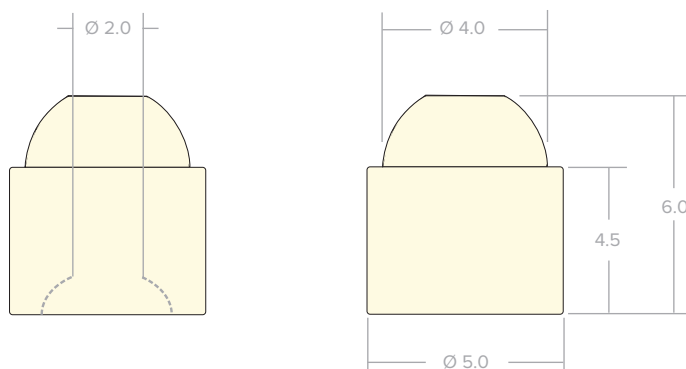

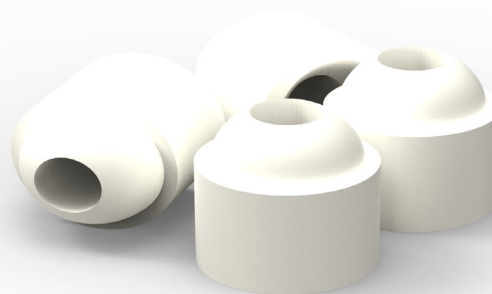

Ceramic dome head interlocking insulating beads (Steatite C221) for flexible electrical insulation on wires.

Steatite material has excellent electrical resistance at high temperatures, good mechanical strength and a very low dielectric loss factor.

Bead size outside diameter 5.0mm, inside diameter 2.0mm, overall height 6.0mm.

Sold by 1kg bag, approx. 5,100 beads per bag. Approx. 200 beads per metre.

Manufactured in-house.
